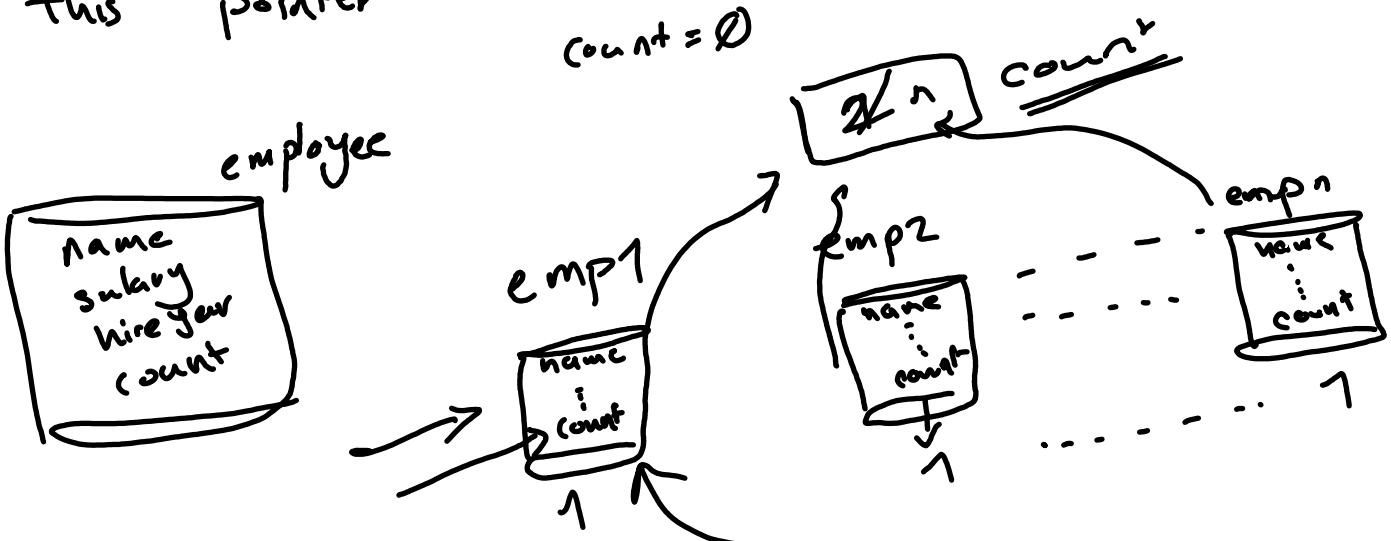
Outline:

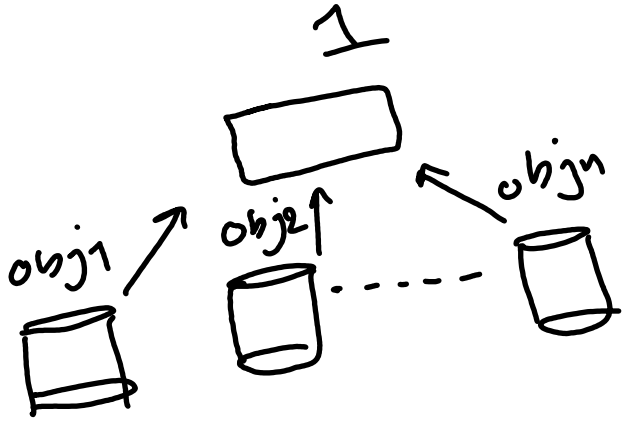
- Static members ✓
- why and when should we define destructor? ✓
- reference vs. pointer
- this pointer

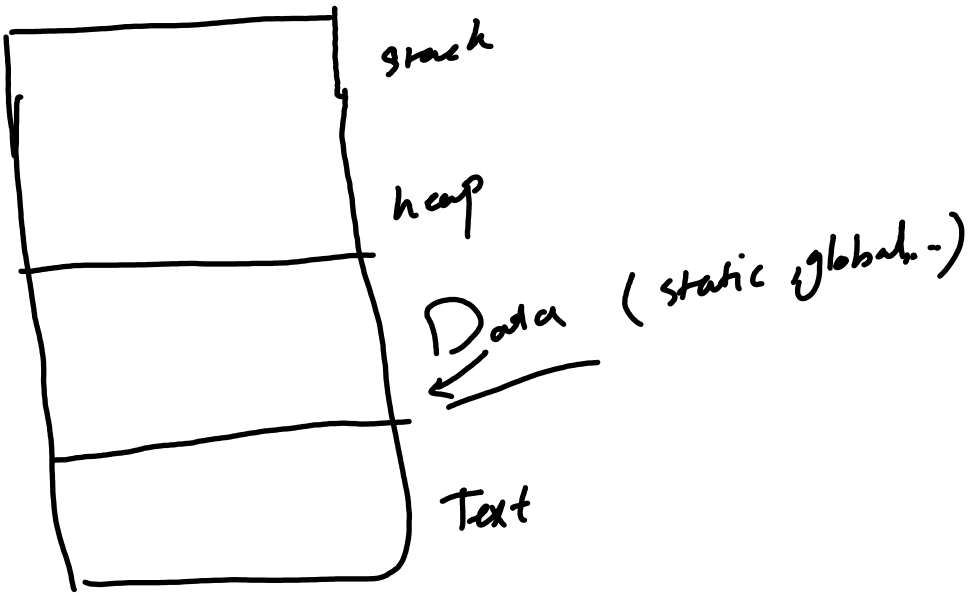


```
employee emp1;
emp1.employee();
employee emp2;
emp2.employee();
```

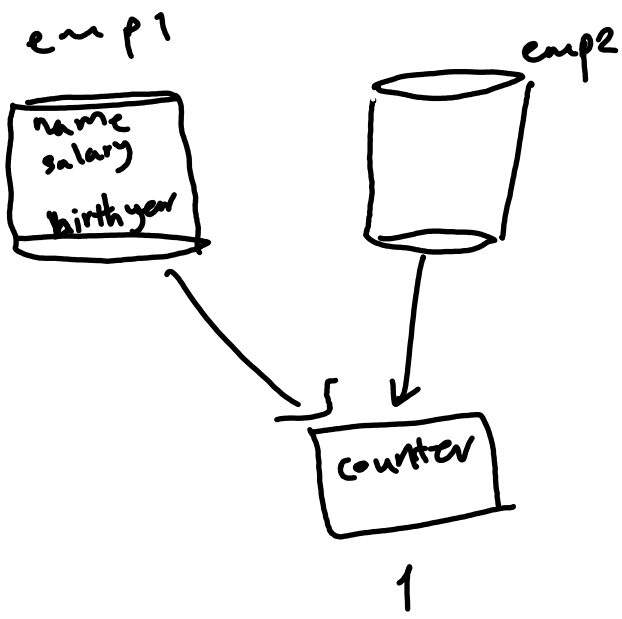
1- global variable ✗

2- Static data member



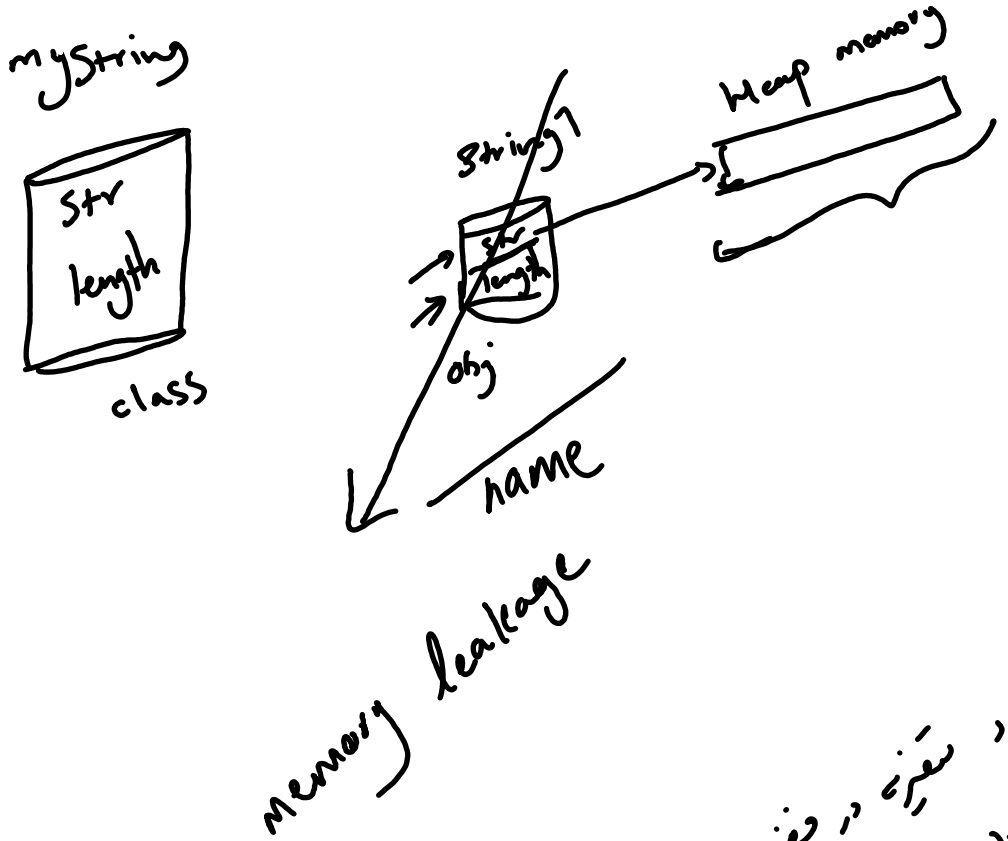


stack
heap
Data (static, global, -)
Text



employee emp1

emp1.employee()



memory leakage

هرجا در این کلاس حرف سفارش در قسمت heap داریم
با این میدونیم که از تشکیل حافظه به میزان طول رشته ایجاد میشه.

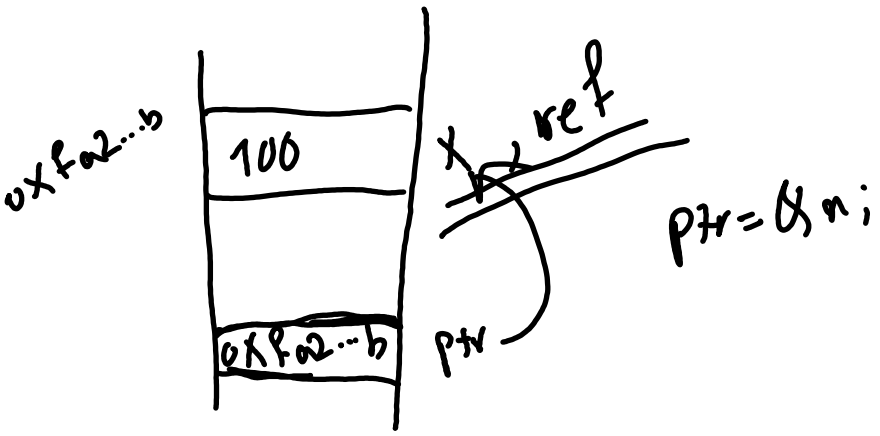
C++

Pointer

reference

C

pointer



"This" Pointer

استفاده از this:

۱- با بردن عناصر به
۲- عدم تداخل با متغیرهای محلی
۳- برگرداندن آدرس
