

string concatenation

- Time limit: 1 second
- Memory limit: 256 MB

If we have strings a and b, the operation of putting these two strings together is called String Concatenation.

Note: It is forbidden to use string library functions.

Input

The input consists of two lines in which two strings a and b are listed in two consecutive lines. The maximum length of both strings is 50 characters.

Output

The output of the program contains a line in which the string ab is printed.

Sample input 1
