

Practice of the first session of the basics workshop on Tuesday

?How should I print

How should I print? So far, we know how to create a project and print a text. Now we want to see how to print so that Quora accepts! Quora has a homework correction system that accepts only one type of print. And that is the type that we give you in the question examples. If your print format is different from that type, Quera will tell you wrong and your score will be reduced! For example, it is sensitive to small and capital letters or space and spacing! So be careful that if you solve the question correctly, your score will not decrease. Now, for this question, we want you to come and print the sentence "Hello World" in several different formats for us.

##Formats you should print:

```
Hello World
hello world
HelloWorld
```
