

$$n[n] = \begin{cases} \cos\left(\frac{n\pi}{N}\right) & 0 \leq n \leq N-1 \\ 0 & N \leq n \leq \infty \end{cases}$$

حل اول
T=91

$$a_k = \frac{1}{N} \sum_{n=-\infty}^{\infty} n[n] e^{jkn\omega_0}$$

$$\omega = \frac{2\pi}{T} = \left(\frac{\pi}{2}\right)$$

$$n[n] = \begin{cases} \frac{e^{j\left(\frac{n\pi}{N}\right)} + e^{-j\left(\frac{n\pi}{N}\right)}}{2} & 0 \leq n \leq N-1 \\ 0 & N \leq n \leq \infty \end{cases}$$

درون پالس
N (درون پالس)

FS

$$a_k = \begin{cases} \frac{\sin\left(k\pi \frac{N+1}{N}\right)}{N \sin\left(\frac{k\pi}{N}\right)} & k \neq 0, \pm N \\ \frac{N+1}{N} & k = 0, \pm N \end{cases}$$

و فی الواقع که در جدولی فکری سبقت یافته ایم

$$e^{j\pi\left(\frac{N+1}{N}\right)n} n[n] \xrightarrow{FS} a_{k-N}$$

$$e^{j\left(\frac{n\pi}{N}\right)} = e^{j\pi\left(\frac{N+1}{N}\right)n} \rightarrow \boxed{N=1}$$

$$e^{j\pi\left(\frac{N+1}{N}\right)n}$$

و طبق خاصیت فنی در جدولی فکری سبقت یافته ایم

$$n[n] = \begin{cases} \frac{1}{2} e^{j\left(\frac{n\pi}{N}\right)} & 0 \leq n \leq N-1 \\ 0 & N \leq n \leq \infty \end{cases} + \begin{cases} \frac{1}{2} e^{-j\left(\frac{n\pi}{N}\right)} & 0 \leq n \leq N-1 \\ 0 & N \leq n \leq \infty \end{cases}$$

$$\frac{1}{2} e^{j\left(\frac{n\pi}{N}\right)} \text{ همان پالس است که در } \frac{1}{2} e^{-j\left(\frac{n\pi}{N}\right)}$$

$$a_k = \frac{1}{2} g_{k-1} + \frac{1}{2} g_{k+1}$$
