

## (GCPD - (One-liner

- Time limit: 1 second
- Memory limit: 256 MB

After the adventures of the previous episode, this time, Qoli decided to go on a fun trip to Jamila City (it is said that the "weather" there is very pleasant almost all year round), but unfortunately, due to a A plane crash took the lives of Gotham City (both abbreviated as GC). His plane was stolen by the evil Joker, but Qoli managed to save himself from the plane with a parachute in a clever move. Khali has come to Commissioner Gordon in the Gotham City Police Department for help. Gordon told Qoli that in order to help the hostages on the plane, the GCPD needed the GCD (B.M.M.) number of Jokers on the plane and the police department's forces so that they could divide their task force into squads. M.M.) divide to deal with joker people. Since all the technicians of the police department are busy tracking the plane, this task is assigned to you. Also, since time is so tight, you have to do it in just one line! that's mean**The body** of your calculator function can only contain one line of code, and that line can only contain a semi-colon!

```
int gcd (int a, int b)
{
```

Final submissions

Scoreboard

```
//one line of code here!  
}
```

## Input

In the first line  $j$  the number of Jokers and in the second line  $g$  the number of forces of the Gotham City Police Department will be given to you.

$$-10^9 \leq J, g \leq 10^9$$

## Output

On the only output line, print the size of the task group handles.

## Example

### Sample input 1

```
1  
2
```

### Sample output 1

```
1
```
