Qoli work project

- Time limit: 1 second
- Memory limit: 256 MB

After a long period of unemployment, he got a job project for the electricity department. The Electricity Authority has prepared a new formula for calculating the consumption bill of its employees, which is as follows:

Based on the amount of electricity consumed per unit:

For the first 50 units: $0.5 per unit, for the next 100 units: $0.75 per unit, for the next 100 units: $1.2 per unit, for more than 250 units: $1.5 per unit

20% tax is added to the above amount.

Input 🔗

The input contains only one input that tells the amount of electricity consumed. whose value is correct.

	Questions
