# Phonebook

In this question, you have to design a phone book like the picture below:

Explanation: Implement the different parts according to the overall function of that part which is explained below and to your taste:

- Add button: Add a contact to the phonebook

- Edit button: Edit the current contact

- Remove button: Delete the current contact

- Find button: find a contact and display it

- Load button: loading a phonebook using its file

- Save button: Save the phonebook in such a way that if it is clicked the first time, it works like the Export button, but it will be saved on the same extracted file for the next times.

- Export button: Save the phone book in the location chosen by the user

- Next and Previous buttons: move back and forth in the phonebook

** It is obvious that the better the function of your program and the more predictable its different parts, the higher your score will be.
