Practice of the first session of the basics workshop on Tuesday

do you know how to beat

Qanbar had a problem with the multiplication table when he was in the third grade. Mrs. Heshmatian wanted to ask him about the multiplication table. Qanbar knows everything except the coefficients of 5. Now you write a program that helps Qanbar calculate the product of a number by 5. Note that the input number is between -100 and 100.
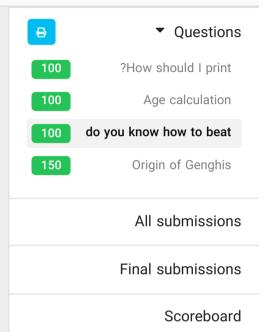

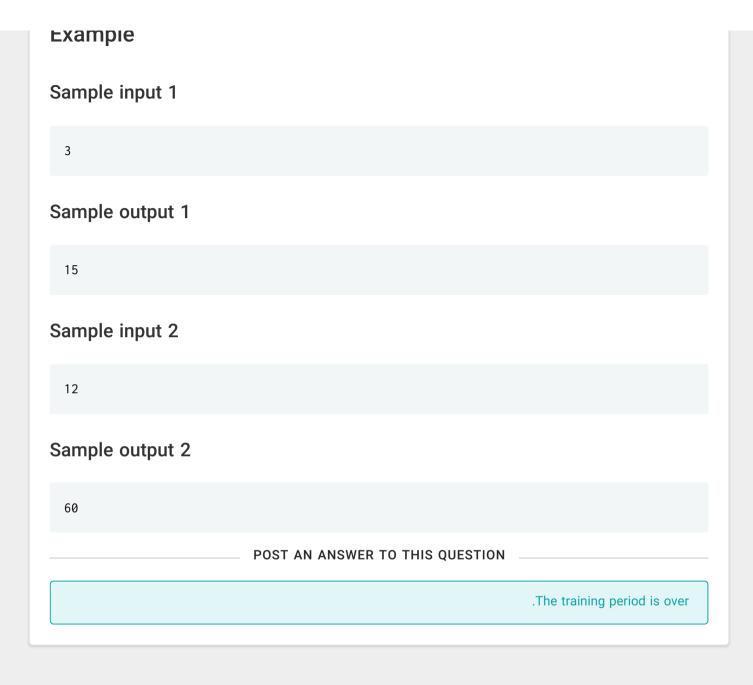

$$-100 < n < 100$$

Input

The input consists of only one line in which an integer is entered.

Output

The output consists of a line that is the product of the number entered in the input multiplied by 5.

Example

Sample input 1

3

Sample output 1

15

Sample input 2

12

Sample output 2

60
